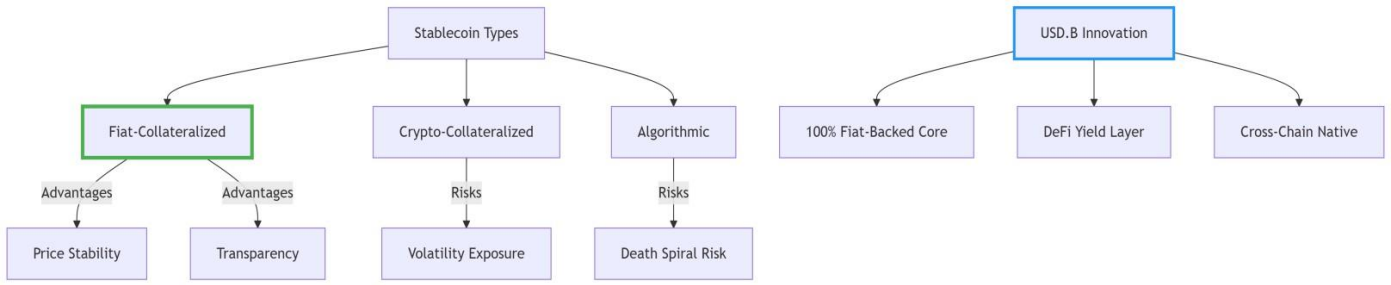
Ultra Sonic USD (USD.B) - Comprehensive Whitepaper

1. Introduction to Ultra Sonic USD

Ultra Sonic USD are a new coin at BNB smartchain blockchain-based liquidity was added to maintain stable value by pegging to external assets like fiat currencies. USD.B adopts a revolutionary hybrid model that merges the stability of traditional fiat-collateralized systems with the innovation and efficiency of decentralized finance (DeFi). USD.B implements a revolutionary hybrid model:



Key Features:

- **Fixed Supply:** 27.5 billion USD.B hard cap to prevent inflation.
- **Dual Collateral:** 85% fiat/treasury + 15% yield-generating DeFi assets.
- **Real-Time Attestation:** Chainlink Proof-of-Reserve (PoR) oracles.
- **Regulatory Compliance:** Registered with BVI FSC as a Money Services Business.

2. Technical Architecture

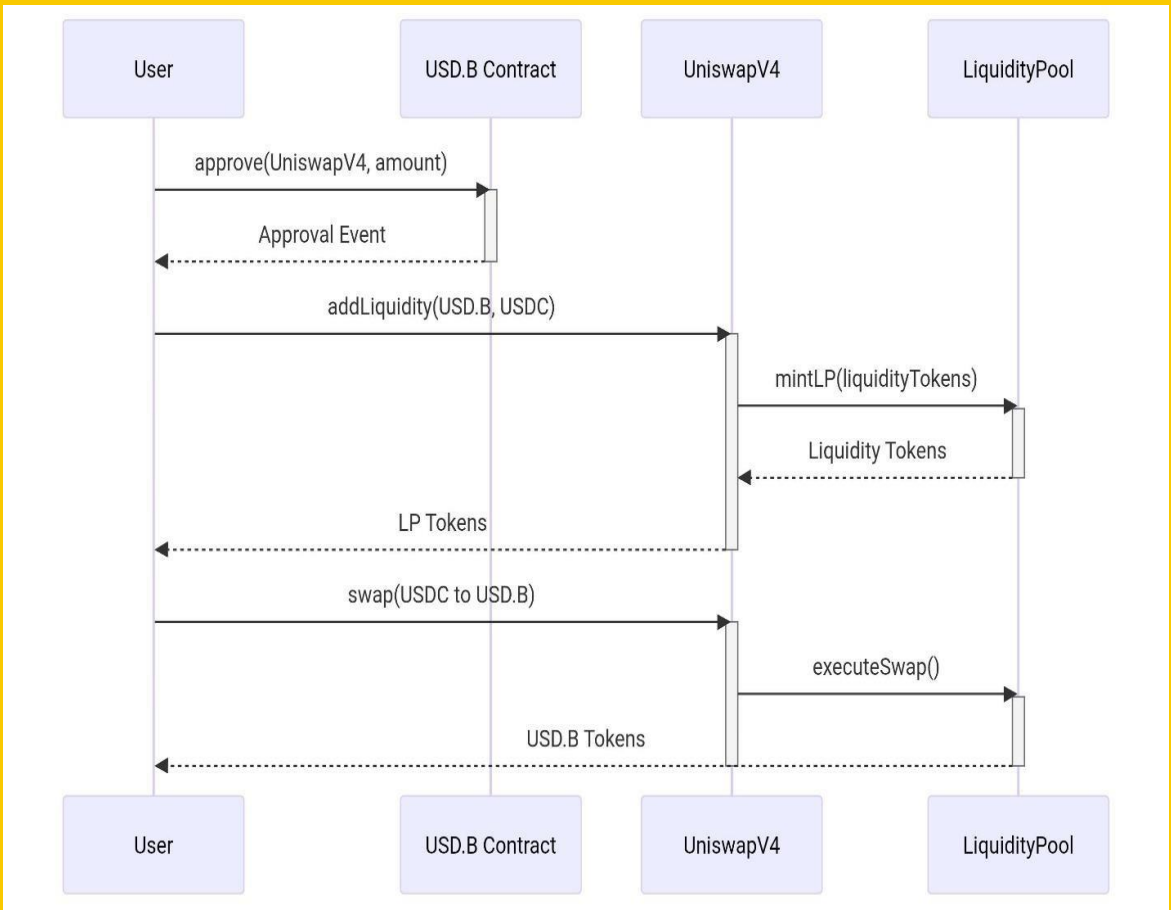
2.1 Multi-Layer Infrastructure

- **Application Layer:** Wallets & merchant integrations.
- **Execution Layer:** Smart contract processing (EVM-compatible).
- **Consensus Layer:** PoSA (Proof-of-Staked Authority) with 41 validators.
- **Data Layer:** zk-Rollups enabling 5,000 TPS.
- **Security Layer:** Multi-sig guardian council for emergency governance.

Performance Metrics:

- Throughput: 5,000 TPS (zk-Rollup enhanced)
- Finality: 500ms transaction confirmation
- Cost: $0.001 average transaction fee
- Scalability: Horizontal validator scaling

2.2 Uniswap V4 Integration

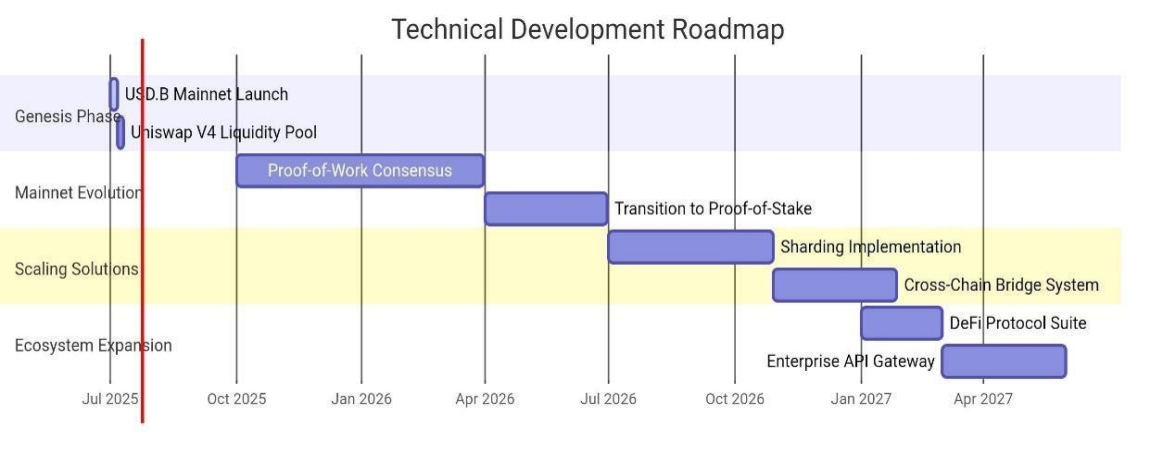


- **Pool Address:** Uniswap USD.B Pool
- **Initial Liquidity:** $21M.
- **Fee:** 0.05% with yield optimization hooks.
- **TWAP Oracle:** Mitigates price manipulation.

2.3 Token Verification and Transparency

- **BSC Token Page:** BscScan Verified Token
- **Smart Contract Verified:** Code audited and verified for transparency.
- **Live Reserve Dashboard:** Coming soon via Chainlink PoR integration.

3. Tokenomics

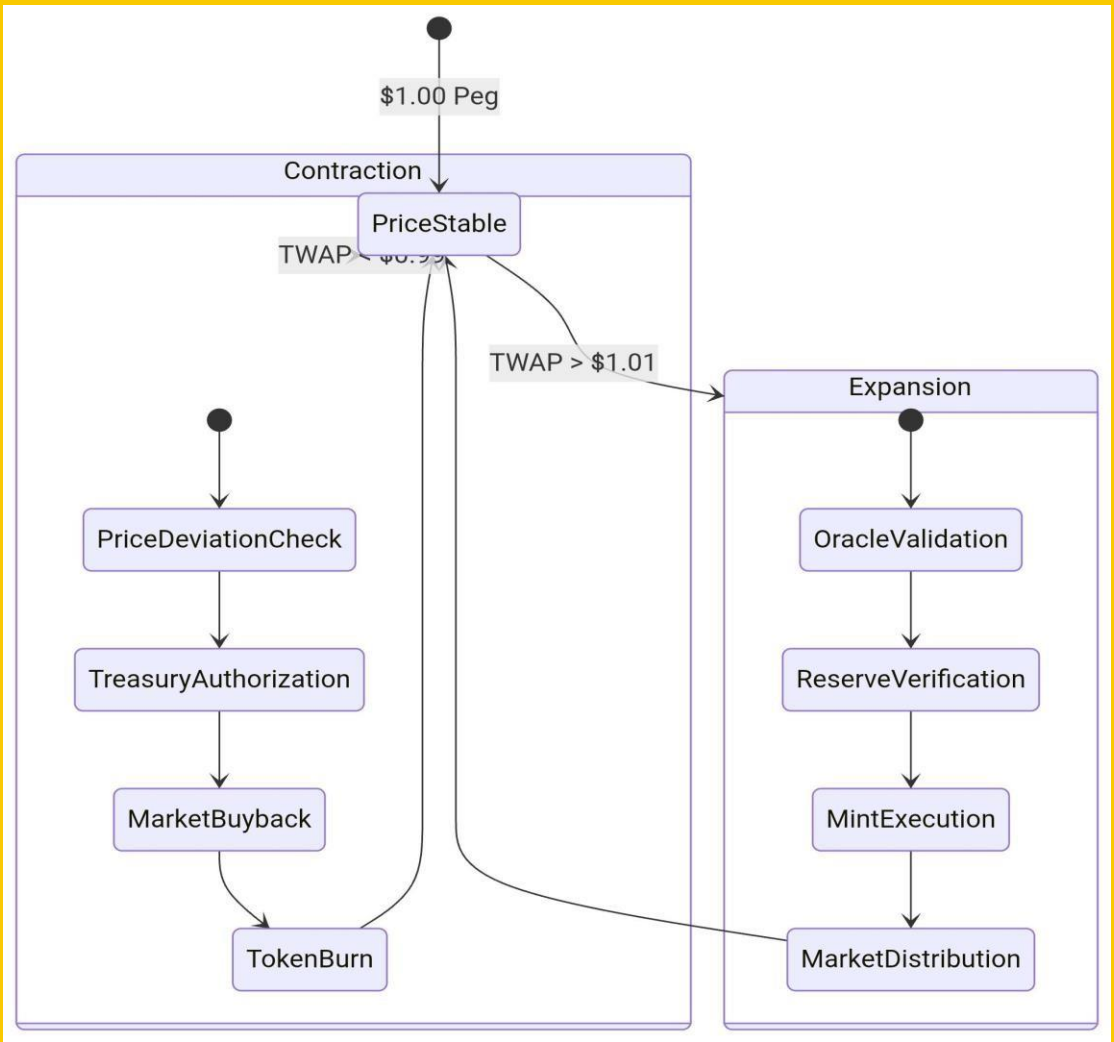


Professional Gantt Chart Explanation:

1. **Genesis Phase (July 2025):**
    1. **USD.B Mainnet Launch: Core network activation (5-day window)**
    2. **Uniswap V4 Liquidity: Initial $21M liquidity deployment**
2. **Mainnet Evolution:**
    1. **Proof-of-Work Phase: Initial consensus mechanism (Oct 2025 - Mar 2026)**
    2. **Proof-of-Stake Transition: 90-day migration to energy-efficient consensus**
3. **Scaling Solutions:**
    1. **Sharding Implementation: 120-day horizontal scaling upgrade**
    2. **Cross-Chain Bridges: 90-day interoperability development**
4. **Ecosystem Expansion:**
    1. **DeFi Protocol Suite: 60-day decentralized finance module deployment**
    2. **Enterprise API: 90-day business integration framework**

3.1 Supply Distribution

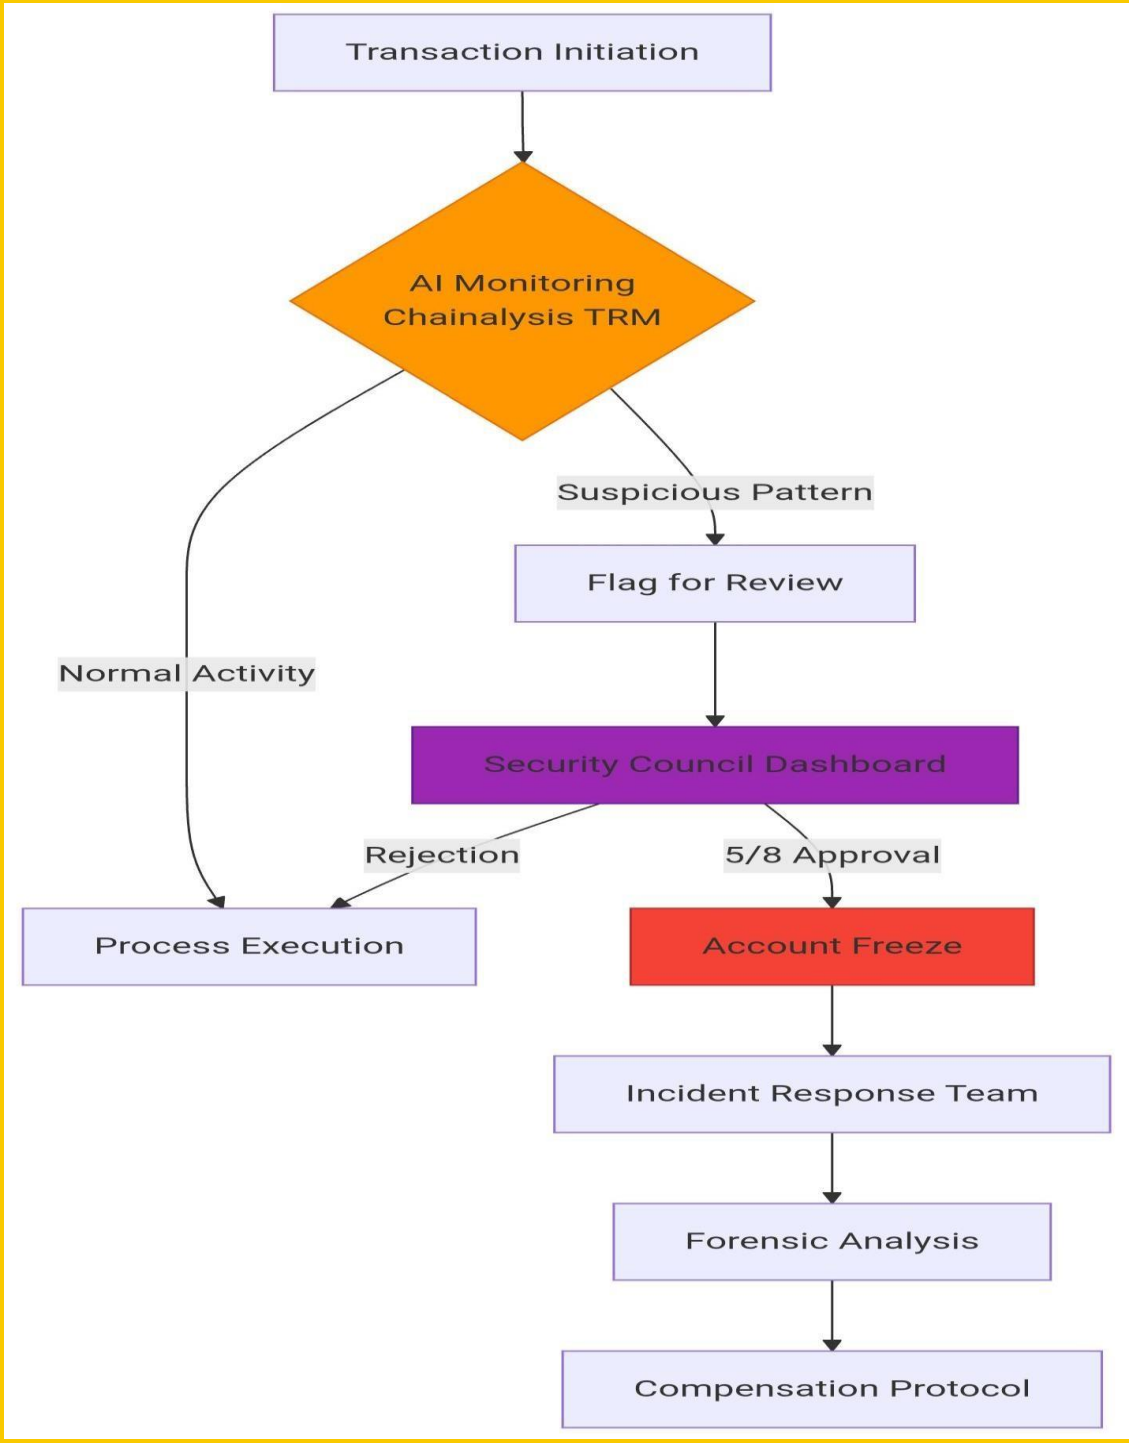
Category	Tokens	% of Total	Release Schedule
Liquidity	21M	0.0076%	Locked for 2 years
Staking	17.79B	64.99%	Linear over 4 years
Ecosystem	4.125B	15%	DAO-controlled release
Team	2.75B	10%	3-year vesting, 1-year cliff
Burns	2.75B	10%	Strategic quarterly burns



3.2 Peg Stability Protocol

- **Expansion:** TWAP > $1.01 triggers new minting (if reserves >102%).
- **Contraction:** TWAP < $0.99 triggers treasury buyback & burn.
- **Arbitrage Margin:** 0.3% profit during peg deviations.
- **Redemption:** 1:1 with 0.1% fee.

4. Security Framework



5. Core Team & Transparency

Key Personnel

Name	Role	Background Summary
Bouchra Rubbens	CEO	Manage of project at BNB smart chain
René Vincent RUBBENS	Technical Director	Led EIP-1559 upgrade and infrastructure builds
Mónica Fernández de los Ríos	CFO	Legal compliance and investor contracts
Hellems Bwire, PhD	Security Architect	Wallet & system security expert
Dasilva Florinda	Marketing Director	Marketing USD.B for investors around worled
Jesus Varela Gómez	COO	Political & regulatory project strategy
Yuriy Kreynis	Blockchain Development Director	Development blockchain engineering and maintaining
Toukoui Hervé Guillaume	Legal Lead	Licence en commerce et master en leadership et en management

Note: Full LinkedIn profiles and Facebook will be released via the official website for increased transparency.

6.1 Milestone-Based Development Plan

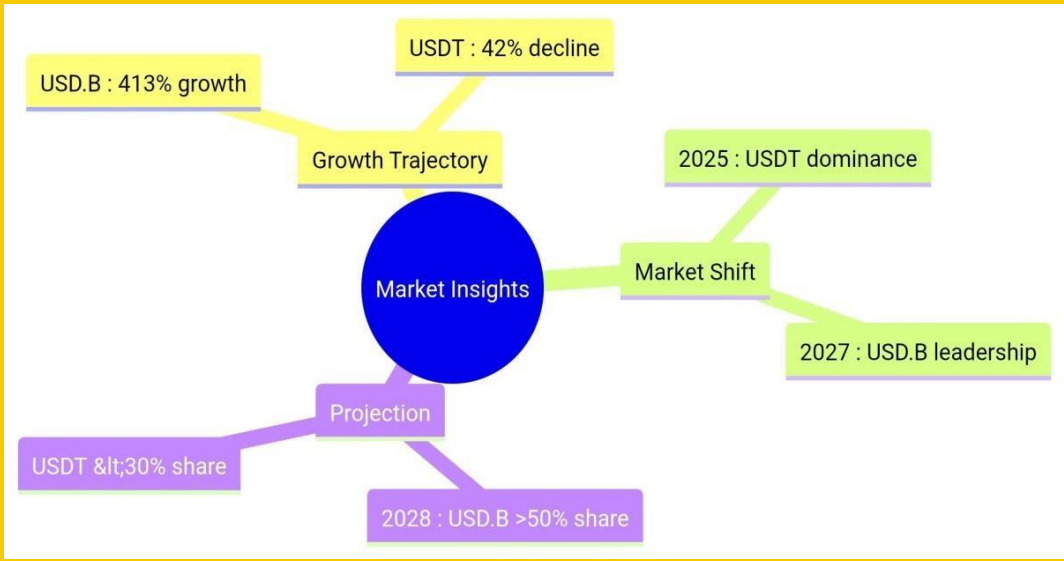
- **July 2025:** USD.B Mainnet Launch
- **Oct 2025 – Mar 2026:** PoW → PoS transition
- **Q2 2026:** Sharding, zk-Rollups, cross-chain bridges
- **Q3 2026:** Launch DeFi Suite + Enterprise API

6.2 Exchange & Liquidity Deployment

Platform	Type	Paired Asset	Value	Lock Period
Uniswap V4	DEX	USDX	$21M	2-year (live)
Binance	CEX	USDT	$15M	Pending approval
PancakeSwap	DEX	BUSD	$5M	6-month (pending)
Balancer V3	DEX	DAI	$3.5M	90-day (pending)

7. Financial Projections

7.1 Market Penetration



- **2025:** 8% of BNB Chain stablecoin market
- **2026:** Become DeFi settlement layer on BNB
- **2027:** Handle 5% of global cross-border payments
- **2028:** Tokenize $5B in real-world assets

7.2 Revenue Model

Year	TVL	Yield	Revenue	Staker APY
2025	$420M	5.1%	$21.4M	3.32%
2026	$1.2B	5.4%	$64.8M	3.51%
2027	$3.8B	5.9%	$224.2M	3.84%
2028	$9.5B	6.3%	$598.5M	4.10%

8. Regulatory Compliance

- **BVI:** Fully licensed under Digital Assets Act 2024
- **EU:** MiCA pre-approval process in progress
- **US:** FinCEN MSB registered
- **APAC:** Ongoing consultation with MAS (Singapore) and JFSA (Japan)
- **AML/KYC:** Implemented via Chainalysis KYT

9. Legal Disclaimers & Risk Mitigation

- USD.B does not guarantee fixed returns.
- Market volatility, smart contract vulnerabilities, and peg breaks are possible.
- Users must perform independent risk assessments.

10. Conclusion

USD.B represents a new era of hybrid stablecoins — fusing financial stability with DeFi transparency. With its fixed supply, robust peg mechanisms, and commitment to compliance, it aims to be a trusted bridge between traditional finance and Web3.
